

AMENDMENTS TO CLAIMS

The status of all claims and the text of pending claims, with markings to show current changes relative to the immediately prior version, follows.

1. (Currently Amended) An impact tool, comprising:
a shaft;
a stop on said shaft;
a slider movable on said shaft for striking said stop to create an impact force; and
a handle on said slider to allow a user to move said slider;
wherein said handle ~~is~~ moves relative to said slider when said slider strikes said stop to
isolate said handle from said impact force.
2. (Original) The impact tool as recited in claim 1, wherein said handle is movably attached to said slider.
3. (Original) The impact tool as recited in claim 2, wherein said handle is rotatably attached to said slider.
4. (Original) The impact tool as recited in claim 1, wherein said handle comprises two legs extending from said slide and a central section between said legs.
5. (Original) The impact tool as recited in claim 1, wherein the user can grasp said handle with the wrist in a normal position.
6. (Currently Amended) The impact tool as recited in claim 5, wherein said handle includes a gripping section located a distance away from said slider.
7. (Original) The impact tool as recited in claim 6, wherein said slider moves along said shaft in a direction, and said gripping section extends transverse to said direction.

Serial No. 10/624,752
Docket No. EH-10667

8. (Currently Amended) An impact tool, comprising:
a shaft;
a stop on said shaft;
a slider movable on said shaft for striking said stop to create an impact force; and
a handle movably attached to said slider to allow a user to move said slider and moveable relative to said slider when said slider strikes said stop.
9. (Original) The impact tool as recited in claim 8, wherein said handle is rotatably attached to said slider.
10. (Original) The impact tool as recited in claim 8, wherein said handle comprises two legs extending from said slide and a gripping section located between said legs.
11. (Original) The impact tool as recited in claim 8, wherein the user can grasp said handle with the wrist in a normal position.
12. (Original) The impact tool as recited in claim 11, wherein said handle includes a gripping section located a distance away from said slider.
13. (Original) The impact tool as recited in claim 12, wherein said slider moves along said shaft in a direction, and said gripping section extends transverse to said direction.
14. (Currently Amended) A slider for an impact tool, comprising:
a sleeve; and
a handle movably attached to said sleeve to allow a user to move said slider;
wherein said handle moves relative to said slider when said slider strikes a stop on said impact tool to isolate said handle from a force created by said slide striking said stop.
15. (Original) The slider as recited in claim 14, wherein said handle is rotatably attached to said sleeve.

Serial No. 10/624,752
Docket No. EH-10667

16. (Original) The slider as recited in claim 14, wherein said handle comprises two legs extending from said sleeve and a central section between said legs.
17. (Original) The slider as recited in claim 14, wherein the user can grasp said handle with the wrist in a normal position.
18. (Original) The slider as recited in claim 14, wherein said handle includes a gripping section located a distance away from said slider.
19. (Currently Amended) The slider as recited in claim 18, wherein said impact tool has a shaft, said slider is adapted to move along said shaft in a direction, and said gripping section extends transverse to said direction.
20. (New) An ergonomic tool, comprising:
a shaft;
a stop on said shaft;
a slider movable on said shaft for striking said stop to create an impact force; and
a handle on said slider to allow a user to move said slider;
wherein said handle moves relative to said slider as the user moves said slider towards and away from said stop.
21. (New) The tool as recited in claim 20, wherein said handle is movably attached to said slider.
22. (New) The tool as recited in claim 20, wherein said handle is rotatably attached to said slider.
23. (New) The tool as recited in claim 20, wherein said handle comprises two legs extending from said slide and a central section between said legs.

Serial No. 10/624,752
Docket No. EH-10667

24. (New) The tool as recited in claim 20, wherein the user can grasp said handle with the wrist in a normal position.

25. (New) The tool as recited in claim 24, wherein said handle includes a gripping section located a distance away from said slider.

26. (New) The tool as recited in claim 25, wherein said slider moves along said shaft in a direction, and said gripping section extends transverse to said direction.
